four elements

Improving the digital skills of our elder citizens

3rd Transnational Partnership Meeting, in Kamnik Slovenia

The consortium has finally met face to face. The meeting has been held on the 22nd and 23rd of February in Kamnik, Slovenia. During the meeting partners reviewed the training methodology plan, agreed on the LTAA Agenda in Athens, presented the first guidelines for R4 Mentoring methodology and the Dissemination impact.

DIGITAL GENERATIONS PROJECT

#2 Newsletter

GOOD PRACTICES REPORT

identifies the best practices in supporting digitalisation and inclusion of elder population at a EU level. Is available in [DG Website](#) in all partner languages and compiles 12 great practices to hopefully inspire our work or support with our relatives.

TOOLS HANDBOOK

2nd Project result

The partners have finalised the second project result of the project and is [available in the website](#) in all partner languages. The objective of this handbook is to serve as support to improve the digital skills of seniors and elder population. In that sense it includes an evaluation form to measure the level of digital skills so from there from there they we will try to upgrade their knowledge.

The Handbook also compiles 30 tools divided into the following 5 categories:

- Basic digital skills
- Skills to carry out online activities
- Online communication skills
- Skills to ensure online security

Skills on how to be creative online

What is next?

During the next month we have a 3 day training for youth in Athens where the young people will learn the training methodology. The following steps of the project will be to pilot the training methodology and to develop the Mentoring methodology.

The [Digital Generations website](#) is available now in all partner languages!

Stay tuned!
